

The Second Cycle Institutional Accreditation Practice Planning Project

This project is design to let the second cycle institutional accreditation practice smooth and successful. It focuses on the details of implementation of second cycle institutional accreditation, such as the on-site visits process, the evaluators selection and training, the evaluator courses and manual, and the development of result judgment tools. Furthermore, in order to let the universities to be evaluated can fully understand the plan, HEEACT held four forums in three places around Taiwan to help universities and facilitated mutual communications.
