

## The Third Cycle Program Accreditation Pilot Project

This project is to design the third cycle program evaluation plan for comprehensive universities. In order to reflect the spirits of the second cycle program evaluation and the second cycle institutional evaluation, the MOE policies and stakeholders' opinions, we use the document analysis and consultant meeting methods to collect the opinions and evidences to plan this evaluation. After analyzing those evidences, we plan to conduct the third cycle program evaluation with the ideal of "implementation of learning-based and establishment quality culture" in next five years.
