

## Designing Training Courses for Evaluation Planning and Implementing Staff in Universities and Crossborder Quality Assurance Evaluators Project

The main purpose of the study is to design training courses for staff who are in charge of evaluation in universities and evaluators who are pointed to be a crossborder evaluators. According to the previous research done by HEEACT, This project is trying to design two training courses including 'project management of selfdirected evaluation' & 'university self evaluation report writing practices'for university staff to master self-directed evaluation, and 'crossborder quality assurance trends and development'course for evaluators to increase their ability to evaluate aboard
